

EROSION PREVENTION & SEDIMENT CONTROL (EPSC) PLAN FOR SMALL-SINGLE FAMILY LOTS

Site Development Permit Number _____

For small single-family residential sites affecting <10,000 sqft, circle one of the options below for the EPSC schematic that best describes the measures that will be used on this property during construction. If options A through F do not adequately reflect site conditions, add flow lines and EPSC measures to Option G, as appropriate. The EPSC details can be found on page 2 of this Form.

Option A

Option B

Option C

Option D

Option E

Option F

Option G

LEGEND

	Silt Fence (ES-14)
	Stabilized Construction Entrance (ES-01)
	Direction of Flow (Points Downhill)

In addition to the installation of the proper EPSCs, temporary seeding is required when grading operations are temporarily halted for over 14 days and on soil stockpiles. Permanent seeding is required when grading operations are completed and/or construction operations will not impact the disturbed area. Seed areas that show signs of excessive erosion.

Prior to digging, call 811 to verify utility locations. For more information on the following details see the City of Knoxville [BMP Manual](http://knoxvilletn.gov/government/city_departments_offices/engineering/stormwater_engineering_division/bmp_manual/) at http://knoxvilletn.gov/government/city_departments_offices/engineering/stormwater_engineering_division/bmp_manual/
