Hedstrom Design
130 West Jackson Avenue, Suite 104
Knoxville, Tennessee 37902

Attention: Ms. Sara Hedstrom

**Reference: Report of Environmental Review and Preliminary
Cultural Resources Evaluation**
Downtown North Streetscapes Project
Knoxville, Tennessee
S&ME Project No. 1437-09-103

Dear Ms. Hedstrom:

S&ME, Inc. has completed the Environmental Review and Preliminary Cultural Resources Evaluation for the above-referenced property. The attached report presents the results of S&ME's review of the site, which was performed in accordance with S&ME Proposal No. 3709177 dated April 6, 2009 and authorized by your acceptance of our proposal. If we can be of any further assistance, please call us at 865-970-0003.

Sincerely,

S&ME, Inc.

Timothy S. Schalk

SUMMARY

S&ME, Inc. (S&ME) has performed an Environmental Review and Preliminary Cultural Resources Evaluation for the Downtown North Streetscapes Project in Knoxville, Tennessee. The following summary is intended as an overview of the Environmental Review and Preliminary Cultural Resources Evaluation, and does not include the complete findings of the full report.

The subject property currently consists of numerous parcels located north of Depot Avenue, south of Oklahoma Avenue, east of Bernard Avenue, and west of the James White Parkway. The properties consist of residential, commercial, and industrial properties in addition to Old Grey and Knoxville National Cemeteries.

Reviews of regulatory databases and Sanborn Fire Insurance Maps have identified numerous existing and former facilities which may present environmental concerns during redevelopment activities. Most of the facilities are, or were, located along North Broadway or Central Avenue, or in close proximity to these two corridors. Additional facilities are located on the southwest portion of the project area, along Cooper Street. The existing and former facilities typically were gas stations, auto dealerships and repair facilities, hazardous waste facilities, and dry cleaners. Residential areas may contain heating oil USTs. Additional unregistered and abandoned USTs may be located throughout the project area.

Reviews of cultural and archaeological information have identified eight structures listed on the National Register of Historic Places. The Knox County architectural survey has identified numerous historical structures, many of which are concentrated in the Old North Knoxville Historic District (North Knoxville and Happy Hollow neighborhoods). In addition to these historical structures and districts, one archaeological site has been recorded west of the intersection of Wells and Folsom Avenues, at the Loves Tower development. Ms. Ann Bennett with the Metropolitan Planning Commission has also provided information on several properties which may be eligible for listing on the National Register of Historic Places.

S&ME recommends that prior to redevelopment activities along or in the vicinity of the identified sites, additional environmental investigations be performed. If environmental impacts are identified during development, remediation activities should be performed in accordance with local, State, and Federal regulations. Please be advised that due to budgetary constraints, the scope of work was limited to a preliminary data review and summary. Due to the number of properties involved and database limitations, it is possible that properties of concern may not have been identified. As specific areas are considered for redevelopment, more detailed evaluations may be warranted.

1. INTRODUCTION

S&ME, Inc. (S&ME) conducted an Environmental Review (ER) and Preliminary Cultural Resources Evaluation (CRE) for the Downtown North Streetscapes Project area in Knoxville, Tennessee. The ESA and HCRE were conducted in accordance with S&ME, Inc. Proposal No. 3709177 dated April 6, 2009.

1.1 Purpose

The scope of work was prepared for Hedstrom Design and the City of Knoxville. The purpose of the ER is to identify current and historical properties within the project area and on adjoining properties which may have potential environmental impacts which may affect future design considerations. Please note that this ER is not being performed in compliance with ASTM Standard Practice E 1527-05. The purpose of the CRE is to document identified historic and potentially historic properties and archaeological sites within the project area which may affect future design considerations.

1.2 Detailed Scope of Services

1.2.1 Environmental Review and Preliminary Cultural Resources Evaluation

S&ME's approach to performing this ER and CRE consisted of six major tasks. The tasks include 1) a review of the public record; 2) a site reconnaissance; 3) review historical Sanborn[®] Fire Insurance maps; 4) interview regulatory personnel, 5) perform a preliminary cultural resources evaluation, and 6) preparation of a report. Each of these six tasks is discussed in more detail below.

Task 1 - Review regulatory information prepared by Environmental Data Resources, Inc (EDR) to determine which sites within the subject area are listed on federal or state environmental databases. This review included properties located within the Downtown North Streetscapes Project boundaries as well as properties adjoining the project boundaries. The purpose of the review was to locate readily identifiable potential environmental concerns within the project area and adjoining properties which may effect future design considerations.

Task 2 - Perform an area reconnaissance to locate the sites identified by EDR, and look for evidence of additional sites that may have potential environmental impacts. Observations were made from readily accessible public roads, sidewalks, and alleys. S&ME did not enter onto privately owned properties.

Task 3 – Review historical Sanborn[®] Fire Insurance maps for evidence of past operations in the study area that may present environmental concerns.

Task 4 – Interview personnel with the Tennessee Department of Environment and Conservation (TDEC) to identify any other facilities not identified during the previous tasks which may present environmental concerns.

Task 5 – Perform a preliminary cultural resources evaluation of the assessment area.

Task 6 - Report preparation and review.

1.2.2 Exclusions from and Additions to Scope of Services

The assessment did not include any assessment of environmental conditions including, but not limited to sampling of materials (i.e., soil, surface water, groundwater or air), or the assessment of business risk issues such as wetlands, lead in drinking water, fungi or bacteria in on-site buildings, regulatory compliance, cultural risks, industrial hygiene, health/safety, ecological resources, endangered species, indoor air quality (including an evaluation of vapor intrusion), radon or high voltage power lines.

1.3 Limitations of the Review

The findings of this report are applicable and representative of conditions encountered within the assessment area at the time of this evaluation, and may not represent conditions at a later date. The review of regulatory database records was limited to that information which was available to S&ME at the time this report was prepared. While in compliance with the Scope of Services detailed above, these results are not a guarantee or warranty that no environmental conditions exist on sites that have not been identified in the database, or that unidentified sites are free from all contamination. The ER Scope of Services was developed to reduce, but not eliminate, uncertainty regarding the potential for RECs.

The opinions presented in this report are based on findings derived from a site reconnaissance, a review of specified regulatory records and historical sources, and interviews with regulatory personnel. Generally, information obtained from public records is reliable. However, S&ME cannot warrant or guarantee that information provided is complete or accurate.

1.4 Special Terms and Conditions

This ER was conducted in accordance with S&ME Proposal No. 3709177, dated April 6, 2009.

1.5 User Reliance

The resulting report is provided for the sole use of Hedstrom Design and the City of Knoxville. Use of this report by any third parties will be at such party's sole risk except when granted under written permission by S&ME. Any such authorized use or reliance by third parties will be subject to the same Agreement, under which the work was conducted for Hedstrom Design and the City of Knoxville.

The additional party's use and reliance on the report will be subject to the same rights, obligations, and limitations imposed on Hedstrom Design and the City of Knoxville by our Agreement. However, the total liability of S&ME to all parties of the ER shall be limited to the remedies and amounts as provided in the Agreement as a single contract. The additional party's use and reliance on the report shall signify the additional party's agreement to be bound by the proposal and contract that make up the Agreement between S&ME and Hedstrom Design and the City of Knoxville.

2. SITE DESCRIPTION

2.1 Site Location and Current Use

The project area consists of numerous parcels located north of Depot Avenue, south of Oklahoma Avenue, east of Bernard Avenue, and west of the James White Parkway. The properties consist of residential, commercial, and industrial properties in addition to Old Grey and Knoxville National Cemeteries. The location of the project area is depicted on the figures found in Appendix I.

2.2 Current Use of Adjoining Properties

A visual reconnaissance of the adjoining properties was conducted on August 20, 2009. The reconnaissance was limited to properties that were visible from the perimeter of the site, as well as areas that were readily accessible by public roads near the subject site. Descriptions of the properties adjacent to the subject site are outlined as follows:

<u>North</u>	Residential properties characterize a majority the properties adjoining the assessment area to the north. Retail businesses are located along North Broadway and Central Avenue north of the assessment area.
<u>South</u>	Commercial facilities and a rail yard bound the assessment area to the south. Commercial and retail facilities are further south.
<u>East</u>	James White Parkway is immediately east of the subject property. Commercial and retail facilities and residential properties are further east.
<u>West</u>	Commercial facilities are immediately west of the assessment area. A rail line adjoins the southwest assessment boundary.

3. RECORDS REVIEW

3.1 Environmental Database Records

S&ME contracted Environmental Data Resources (EDR) to review available federal and state environmental records regarding the assessment area and adjoining properties. EDR contacts regulatory agencies on a periodic basis to update identified databases. The EDR database report is contained in Appendix II. Please note that the database listing identified all facilities within a one mile radius of the centerpoint of the project area and includes properties outside the project area. Due to budgetary constraints and the number of properties involved, S&ME did not review regulatory agency files for identified facilities which are located within the assessment area and on adjoining properties. A total of 36 facilities were identified (Table 1, Appendix II). Twenty-one of the facilities were identified along or adjoining North Broadway and Central Avenue. The remaining

identified facilities are located in close proximity to North Broadway and Central Avenue and along Cooper Street to the southwest. The listed facilities are identified on Figure 1 (Appendix I). An enlarged copy of Figure 1 is located in a plastic sheet protector at the end of Appendix I.

3.2 Sanborn Maps

S&ME contracted with EDR to conduct a database search of Sanborn Fire Insurance Maps that depicted the assessment area. Sanborn map coverage was provided for the years 1950 and 1968. The review was limited to these two years due to budgetary constraints, the large number of maps available, and extensive coverage of the project area. Sanborn map coverage was available for the entire assessment area except for Old Gray Cemetery, the National Cemetery, and the area northwest of Scott Avenue. S&ME reviewed the maps for facilities that might create environmental concerns. These include manufacturing facilities, gas stations, auto repair businesses, auto dealerships, and dry cleaners. Approximately twelve additional facilities were identified along North Broadway and Central Avenue or in close proximity to these roads. Many of these facilities are longer in existence and some of the properties have been redeveloped for other uses. The identified facilities are located on Figure 1 (Appendix I).

4. ASSESSMENT AREA RECONNAISSANCE

4.1 Methodology and Limiting Conditions

A site reconnaissance of the assessment area and adjoining properties was performed by S&ME staff scientist, Timothy Schalk, on August 20, 2009. The purpose of the assessment area reconnaissance was to identify additional facilities not identified in the regulatory databases or Sanborn maps which may create environmental concerns. S&ME observed properties for evidence of active use of petroleum products or hazardous materials (fuel dispensing pumps, 55-gallon drums) or indications of different past uses of the property (example, observations of Broadway Carpet indicates it was former an auto dealership). Observations were made from roadways and S&ME did not enter onto any private properties. Seven additional facilities were identified during the area reconnaissance. Six of the facilities were identified along, or adjoining, North Broadway and Central Avenue. One additional facility was identified along Cooper Street.

5. INTERVIEWS

5.1 Interviews with Regulatory Personnel

S&ME interviewed personnel with the Tennessee Department of Environment and Conservation (TDEC), Divisions of Underground Storage Tanks (DUST) and Solid Waste Management (DSWM) in Knoxville, Tennessee and the Division of Remediation (DOR) in Knoxville and Nashville, Tennessee. The TDEC personnel were asked to review the facilities identified by S&ME and inform us of any other facilities that they were aware of which may create environmental concerns. Mr. Chris Andel (DOR) identified a former manufactured gas plant site which was located on Bernard Avenue. The property is currently occupied by Knoxville Utilities Board. No other specific facilities were identified by TDEC personnel. Mr. Steve Wilson did highlight the fact

that abandoned USTs and/or active heating oil USTs may still be located in the project area. Former commercial facilities may have abandoned their USTs prior to registration requirements in 1988. Active and abandoned heating oil USTs may be located throughout the project area, primarily in residential neighborhoods. Copies of email correspondences with TDEC personnel is located in Appendix III.

6. PRELIMINARY CULTURAL RESOURCES EVALUATION

6.1 Methodology and Limiting Conditions

The records check for cultural resources was conducted by Kathy Manning, Registered Professional Archaeologist. The National Register of Historic Places Focus database was searched in conjunction with GIS analysis of National Register data. The Knox County portion of the statewide historic structures survey was examined through GIS analysis. Suzanne Hoyal, curator of the State site files, provided information on previously recorded archaeological sites.

Abundant historical resources have been previously recorded within the Downtown North Streetscapes area. Eight properties on the National Register of Historic Places are either within the project area or adjoin it. These include National Cemetery, Old Gray Cemetery, Major Camp's House, St. John's Lutheran Church, Central M.E. Church, Trinity M.E. Church, and the Southern Terminal and Warehouse Historic District. In particular, Fourth and Gill Historic District occupies the northeast quadrant of the project area. Over and above these National Register listings, literally hundreds of historical structures were recorded for the Knox County architectural survey. These structures are concentrated in the Old North Knoxville Historic District (North Knoxville and Happy Hollow neighborhoods). In addition to these historical structures and districts, one archaeological site has been recorded in the project area. It is 40KN126, a historical period dump. This site is located west of the intersection of Wells and Folsom Avenues, at the Loves Tower development.

S&ME contacted Ms. Ann Bennett, the historic preservation director with the Metropolitan Planning Commission (MPC), regarding their knowledge of any cultural resource concerns within the project area. Ms. Bennett stated that "in addition to the National Register-listed historic resources, there are several structures and areas which are thought to be or have been found to be eligible for listing. The Minvilla rowhouses, most recently known as the Fifth Avenue Motel and located at the southwest corner of Broadway and W. Fifth, have been determined eligible for listing and are undergoing a rehabilitation which includes preservation tax credit approved work. The Emory Place Historic District may be a likely vehicle for expansion up Broadway past its intersection with Central, and along Central to the southeast. Lastly, the Happy Holler area, a small commercial neighborhood centered on Central at Anderson, should also be considered potentially eligible for listing on the National Register."

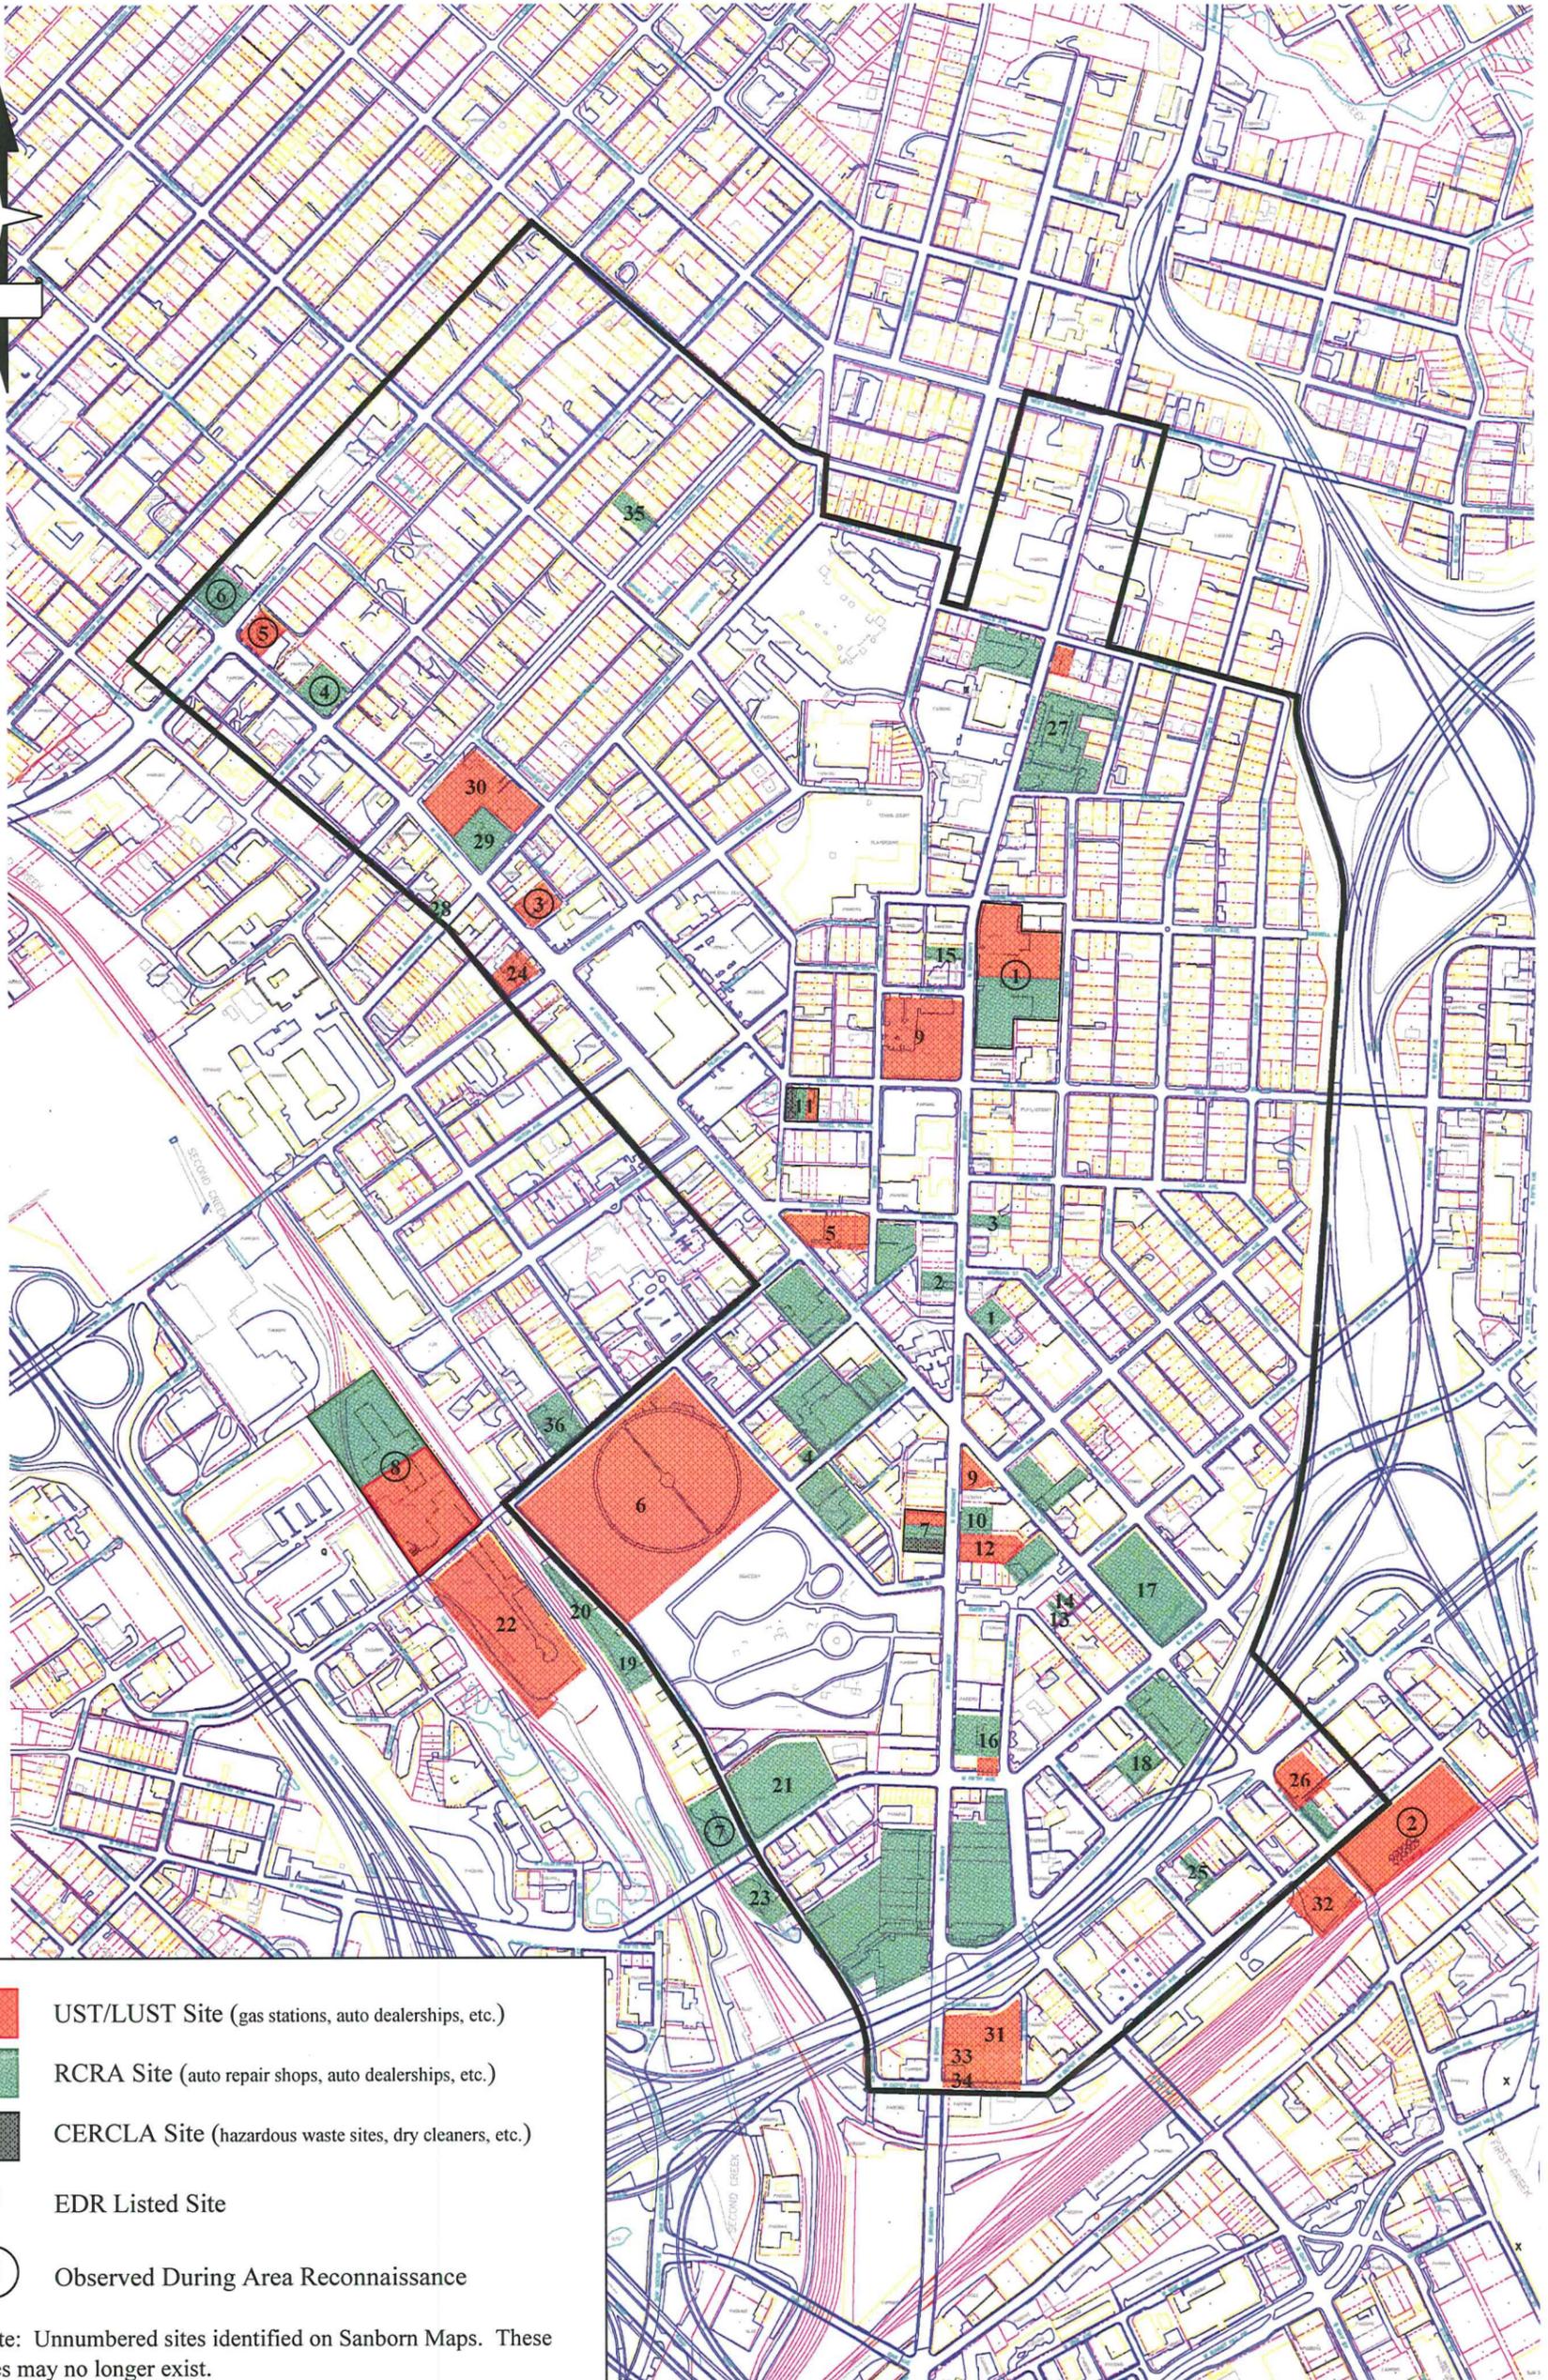

7. CONCLUSIONS

S&ME has performed an Environmental Review and Preliminary Cultural Resources Evaluation of the Downtown North Streetscapes Project area and adjoining properties. Reviews of regulatory databases and Sanborn Fire Insurance Maps have identified numerous existing and former facilities which may present environmental concerns during redevelopment activities. Most of the facilities are, or were, located along North Broadway or Central Avenue, or in close proximity to these two corridors. Additional facilities are located on the southwest portion of the project area, along Cooper Street. The existing and former facilities typically were gas stations, auto dealerships and repair facilities, hazardous waste facilities, and dry cleaners. Residential areas may contain heating oil USTs. Additional unregistered and abandoned USTs may be located throughout the project area. S&ME recommends that prior to redevelopment activities along or in the vicinity of the identified sites, additional environmental investigations be performed. If environmental impacts are identified during development, remediation activities should be performed in accordance with local, State, and Federal regulations.

Reviews of cultural and archaeological information have identified eight structures listed on the National Register of Historic Places. The Knox County architectural survey has identified numerous historical structures, many of which are concentrated in the Old North Knoxville Historic District (North Knoxville and Happy Hollow neighborhoods). In addition to these historical structures and districts, one archaeological site has been recorded west of the intersection of Wells and Folsom Avenues, at the Loves Tower development. Ms. Ann Bennett with the Metropolitan Planning Commission has also provided information on several properties which may be eligible for listing on the National Register of Historic Places. Potential streetscape improvements in the vicinity of historic structures can trigger Section 106 compliance issues, if Federal funds are involved. Local interest in the preservation of historic features is also anticipated. Given the general historical significance of this area, the effects of proposed activities on identified or potential cultural resources should be considered as plans are developed.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

EXECUTIVE SUMMARY

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 01/09/2009 has revealed that there are 2 CERCLIS sites within approximately 0.75 miles of the target property.

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/03/2007 has revealed that there are 2 CERC-NFRAP sites within approximately 0.75 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2009 has revealed that there is 1 CORRACTS site within approximately 0.75 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/12/2008 has revealed that there is 1 RCRA-LQG site within approximately 0.75 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there is 1 RCRA-SQG site within approximately 0.75 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 6 RCRA-CESQG sites within approximately 0.75 miles of the target property.

State and tribal voluntary cleanup sites

VCP: The Voluntary Cleanup Oversight and Assistance Program (VOAP) offers people the opportunity to work proactively with state government to address necessary cleanup of a property to return it to productive use. In return for their efforts, participants can receive a No Further Action letter and a release of liability for areas where investigation and cleanup is conducted. The program is open to everyone with an interest in addressing contamination at a site.

A review of the VCP list, as provided by EDR, and dated 04/27/2009 has revealed that there are 2 VCP sites within approximately 0.75 miles of the target property.

Records of Emergency Release Reports

HMIRS: The Hazardous Materials Incident Report System contains hazardous material spill incidents reported to the Department of Transportation. The source of this database is the U.S. EPA.

A review of the HMIRS list, as provided by EDR, and dated 03/31/2009 has revealed that there is 1 HMIRS site within approximately 0.75 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 69 RCRA-NonGen sites within approximately 0.75 miles of the target property.

EXECUTIVE SUMMARY

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there are 2 FTTS sites within approximately 0.75 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
MONDAY REALTY COMPANY	625 NORTH CENTRAL STREE SSE 1/8 - 1/4 (0.168 mi.)		D14	27
MONDAY REALTY COMPANY	625 NORTH CENTRAL STREE SSE 1/8 - 1/4 (0.168 mi.)		D16	29

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 2 HIST FTTS sites within approximately 0.75 miles of the target property.

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 12/31/2006 has revealed that there are 2 SSTS sites within approximately 0.75 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/28/2009 has revealed that there are 97

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whole oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 0.75 miles of the target property.

Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D004
Waste name: ARSENIC

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D018

Waste name: BENZENE

Waste code: D029

Waste name: 1,1-DICHLOROETHYLENE

Waste code: D039

Waste name: TETRACHLOROETHYLENE

Violation Status: No violations found

Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown
Mixed waste (haz. and radioactive): Unknown
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: Unknown
Furnace exemption: Unknown
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Historical Generators:

Date form received by agency: 03/03/1999
Facility name: KUB, FLEMING CENTER
Site name: KNOXVILLE UTILITIES BOARD (JACKSON AV WA
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

ICIS (Integrated Compliance Information System) is the integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROETHANE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

EPA Region: 04
Land type: Facility is not located on Indian land. Additional information is not known.
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. Importer of hazardous waste: Unknown
Mixed waste (haz. and radioactive): Unknown
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: Unknown
Furnace exemption: Unknown
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 07/20/1984
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List
 National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

EPA Region 10 Telephone 206-553-8665	

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING**Federal Deltsted NPL site list****DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/02/2009	Source: EPA
Date Data Arrived at EDR: 02/12/2009	Telephone: N/A
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 04/20/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 07/27/2009
	Data Release Frequency: Quarterly

Federal CERCLIS list**CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System**

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/09/2009	Source: EPA
Date Data Arrived at EDR: 01/30/2009	Telephone: 703-412-9810
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 05/29/2009
Number of Days to Update: 101	Next Scheduled EDR Contact: 07/13/2009
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List**CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned**

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list**RCRA-TSDF: RCRA - Transporters, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list**RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent NPL

SHWS: Promulgated Sites

"Inactive hazardous substance sites that constitute an imminent, substantial danger" is an inactive hazardous substance site where there is a threat of danger to the public health, safety, or environment which is both real and presently existing. Such situations may include, but are not limited to one or more of the following: an immediate action is necessary to minimize an ongoing threat to the public health or pollution of the environment, an inactive hazardous substance site where there is an active release, where direct access to the hazardous substance is not controlled, or where incompatible hazardous substances are found in close proximity. Also known as Promulgated Sites List.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup, Oversight and Assistance Program Sites

The Voluntary Cleanup Oversight and Assistance Program (VOAP) offers people the opportunity to work proactively with state government to address necessary cleanup of a property to return it to productive use. In return for their efforts, participants can receive a No Further Action letter and a release of liability for areas where investigation and cleanup is conducted. The program is open to everyone with an interest in addressing contamination at a site.

ADDITIONAL ENVIRONMENTAL RECORDS**Local Brownfield lists**

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients—States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites**CDL: Clandestine Drug Labs**

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

CDL: Registry of Contaminated Properties

Pursuant to TCA 68212509 the following properties have been quarantined because of methamphetamine production, but have not been cleaned and certified within the 60day time frame allotted by the statute. These properties are hereby registered by the Tennessee Department of Environment and Conservation as unremediated methamphetamine sites. This is not a comprehensive list of quarantined properties. These are properties that TDEC has been notified as being quarantined, but have not been cleaned within the 60 day grace period. Other properties where methamphetamine production residues are a concern may not have been quarantined, may not have been reported to TDEC, or may not have passed the 60day grace

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oil waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	<u>FEMA Flood Electronic Data</u>
KNOX, TN	Not Available

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
KNOXVILLE	Not Available

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
8	1/2 - 1 Mile West	NNW
9	1/2 - 1 Mile NNE	E
10	1/2 - 1 Mile NNE	FLAT

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	DANDRIDGE
Soil Surface Texture:	shaly - silt loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Excessively. Soils have very high and high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.
Hydric Status:	Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel:	LOW
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 20 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	shaly - silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 7.80 Min: 6.10
2	3 inches	17 inches	shaly - silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 0.60 Min: 0.20	Max: 7.80 Min: 6.10
3	17 inches	35 inches	weathered bedrock	Not reported	Not reported	Max: 0.20 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam

Surficial Soil Types: silt loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: stratified

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Tennessee Spatial Data Server
Telephone: 931-528-6481

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

County Water Wells in Tennessee
Source: Department of Environment and Conservation
Telephone: 615-532-0160

The KUB site on Bernard Avenue is a DOR VOAP site, #47583 - Former Mfg. Gas Plant Site, and actually extends onto the property north of Bernard Avenue. Other than that, it looks like you got everything we know about. I recommend that you contact Nancy Boisvert, DCERP in Nashville for more info on drycleaners - we do not handle them in the field office. Sanitary Laundry is an exception - it was promulgated prior to the inception of the DCERP. Nancy's phone # is 615-253-3876.

Sirs,

As a follow-up to Liz Porter's call to you today, I am enclosing a site map and two tables for the Downtown North Streetscapes project. S&ME has reviewed regulatory databases and Sanborn maps of the assessment area and performed an area reconnaissance. The map shows existing and past facilities which may have environmental concerns. We would like your input regarding any additional facilities which may raise environmental concerns during future redevelopment activities within the assessment area boundary (black line) or on any adjoining facilities.

We appreciate your taking the time to address our request. If you have any questions, feel free to call me or Liz Porter at 970-0003.

Subject: Re: Downtown North Streetscapes Project

Tim,

I looked over the information you sent. This area may still contain active heating oil tanks or abandoned underground storage tanks. Abandoned tanks or tanks not required to be registered with the state could pose an unidentified hazard related to past operations within this development zone. The Division is typically unaware of abandoned and unregulated tanks. Contractors preparing any parcel for construction should be made aware of the potential risk of encountering unexpected petroleum tanks and related contaminated soil. Provisions should be made to manage such material including notification to the Division of Underground Storage Tanks and/or the Division of Solid Waste Management. I think the probability of having a significant number of abandoned tanks within this zone is very high. Let me know if you need additional input.

Tim, my solid waste and hazwaste supervisors have reviewed the report. There are no issues of concern for DSWM at this site.

Sirs,

As a follow-up to Liz Porter's call to you today, I am enclosing a site map and two tables for the Downtown North Streetscapes project. S&ME has reviewed regulatory databases and Sanborn maps of the assessment area and performed an area reconnaissance. The map shows existing and past facilities which may have environmental concerns. We would like your input regarding any additional facilities which may raise environmental concerns during future redevelopment activities within the assessment area boundary (black line) or on any adjoining facilities.

We appreciate your taking the time to address our request. If you have any questions, feel free to call me or Liz Porter at 970-0003.

Tim

It seems like you have identified what I am aware of making use of EDR- which is where I assume you got the info on sanitary, sanborns, etc. Beyond the available lists you already I can't think of anything. We gave Chris a list of all our current cleanup sites, all our closed cleanup sites and the withdrawn sites. As far as I know those are the totality of sites reviewed since the inception of the program in 1997.

Nancy,

Chris Andel in the Knoxville Office recommended that I contact you concerning a preliminary environmental review we are performing for the City of Knoxville. The City is looking to redevelop an area on the north side of town, primarily along North Broadway and Central Avenue.

We are conducting a preliminary environmental review, identifying known active and former facilities which may have environmental concerns during development activities. We have reviewed environmental databases, Sanborn maps, and performed a site reconnaissance. We have also contacted Knoxville field office DUST, DSWM, and DOR personnel.

Chris Andel recommended that I contact you to inquire about dry cleaner sites within the study area. We have identified two active dry cleaners (Paramount Ulika Cleaners and Colonial Cleaners) as well as one inactive site (Sanitary Laundry).

Would you have time to review the attached map and tables for any additional facilities which our research has not identified? I understand that you are going on vacation next week. If you can't review the information before your return, is there another individual who could perform the review?

Thank you for your time to address this!

Subject: Re: Downtown North Streetscapes Project

Tim:

I think the following information should be added *

In addition to the National Register-listed historic resources, there are several structures and areas which are thought to be or have been found to be eligible for listing. The Minvilla rowhouses, most recently known as the Fifth Avenue Motel and located at the southwest corner of Broadway and W. Fifth, have been determined eligible for listing and are undergoing a rehabilitation which includes preservation tax credit approved work. The Emory Place Historic District may be a likely vehicle for expansion up Broadway past its intersection with Central, and along Central to the southeast. Lastly, the Happy Holler area, a small commercial neighborhood centered on Central at Anderson, should also be considered potentially eligible for listing on the National Register.

Ann Bennett

>>> "Tim Schalk" <TSchalk@smeinc.com> 9/15/2009 10:29 AM >>>
Ann,

In response to the voice mail I left yesterday, S&ME is working with the City of Knoxville on the Downtown North Streetscapes project. We are performing an environmental review and preliminary cultural resources evaluation of the project area. Kathy Manning has performed the preliminary cultural review, performing research on published information and contacting state personell. She has identified those properties listed on the National Register, and one archaeological site.

In addition, she mentions the historic districts and the fact that there are numerous historic structures that the Knox County architectural survey has identified. Here is what she wrote:

"The records check for historic resources was conducted by Kathy Manning, Registered Professional Archaeologist. The National Register of Historic Places Focus database was searched in conjunction with GIS analysis of National Register data. The Knox County portion of the statewide historic structures survey was examined through GIS analysis. Suzanne Hoyal, curator of the State site files, provided information on previously recorded archaeological sites.

Abundant historical resources have been previously recorded within the Downtown North Streetscapes area. Eight properties on the National Register of Historic Places are either within the project area or adjoin it. These include National Cemetery, Old Gray Cemetery, Major Camp's House, St. John's Lutheran Church, Central M.E. Church, Trinity M.E.

Church, and the Southern Terminal and Warehouse Historic District. In particular, Fourth and Gill Historic District occupies the northeast quadrant of the project area. Over and above these National Register listings, literally hundreds of historical structures were recorded for the Knox County architectural survey. These structures are concentrated in the Old North Knoxville Historic District (North Knoxville and Happy Hollow neighborhoods). In addition to these historical structures and districts, one archaeological site has been recorded in the project area. It is 40KN126, a historical period dump. This site is located west of the intersection of Wells and Folsom Avenues, at the Loves Tower development."

We would like to have your input into this process. Would you have a few minutes to look over the attached project area map and respond back with any additional information you

may be aware of and which can be included in the report? The purpose of the report is to broadly identify any cultural resource issues that may impact future design considerations. If work is to be performed in the area of these concerns, additional research will be conducted specific to that location.

I appreciate your taking the time to address this. Feel free to call if you have any questions.
